CONSTRUCTION MATERIALS

- ▶ 35% Synthetic Leather
- ▶ 22% 4-Way Spandex
- ▶ 17% Fleece
- ▶ 8% Thinsulate
- ▶ 4% Waterproof Membrane
- ▶ 9% Neoprene
- ▶ 5% Lycra

STANDARDS & CERTIFICATION

Many gloves in the market today claim compliance to EN388 and show a mechanical score symbol. However with many glove brands sourcing from multiple factories, inconsistencies can occur and such compliance claims may not always be able to be validated. Ultimately this may put the glove wearer at risk.

Force360 source their entire FPR gloves from a single manufacturing partner to ensure consistency and reliability of product. Force360 have recognized the weakness of compliance claims and have engaged SAI Global to certify their products and manufacturing facilities for complete peace of mind.

Force360 FPR gloves are certified by SAI Global to Australian Standards AS/NZS 2161.2:2005 (EN420), AS/NZS 2161.3:2005 (EN388) Mechanical Performance. Mechanical risk is the risk caused by abrasion, blade cut, tear and puncture to the wearer of the glove. A tested item is given a performance rating of 1 to 4 (lowest to highest) on some or all of the listed categories. The 'blade cut resistance' test is an exception as it measures from 1 to 5.

For Certified Australian Standard protection, only wear gloves with the Red Tick Tower.

USES

- ▶ Snowfields
- ▶ Coolrooms and refrigeration
- ▶ Gardening
- ▶ Maintenance
- ▶ Shipping
- ▶ Logistics and warehousing

PART NUMBER SIZES

GFPRMX7 S, M, L, XL, XXL

GLOVE CARE

Machine Wash<40°C
Cold Water Rinse
Dryer<60°C

PACKAGING

1 pair per hang cell
6 pair per inner pk
54 pair per ctn
