- ▶ Hi Visibility liner for increased safety awareness

## CONSTRUCTION MATERIALS

- ▶ 42% Synthetic Leather
- ▶ 34% 4-Way Spandex
- ▶ 8% Neoprene
- ▶ 16% Lycra

## STANDARDS & CERTIFICATION

Many gloves in the market today claim compliance to EN388 and show a mechanical score symbol. However with many glove brands sourcing from multiple factories, inconsistencies can occur and such compliance claims may not always be able to be validated. Ultimately this may put the glove wearer at risk.

**Force360** source their entire FPR gloves from a single manufacturing partner to ensure consistency and reliability of product. Force360 have recognized the weakness of compliance claims and have engaged **SAI Global** to certify their products and manufacturing facilities for complete peace of mind.

**Force360** FPR gloves are certified by **SAI Global** to Australian Standards AS/NZS 2161.2:2005 (EN420), AS/NZS 2161.3:2005 (EN388) Mechanical Performance. Mechanical risk is the risk caused by abrasion, blade cut, tear and puncture to the wearer of the glove. A tested item is given a performance rating of 1 to 4 (lowest to highest) on some or all of the listed categories. The 'blade cut resistance' test is an exception as it measures from 1 to 5.

For **Certified Australian Standard** protection, only wear gloves with the Red Tick Tower.

## USES

- ▶ Gardening
- ▶ DIY
- ▶ Construction and mining
- ▶ Maintenance
- ▶ Shipping
- ▶ Logistics and warehousing
- ▶ Automotive

## PART NUMBER SIZES

GWORX5 S, M, L, XL, XXL

## GLOVE CARE

Machine Wash<40°C  
Cold Water Rinse  
Dryer<60°C

## PACKAGING

1 pair per hang cell  
12 pair per inner pk  
72 pair per ctn
