

3M™ Supplied Air

3 Outlet Panel

The 3M™ Supplied Air 3 Outlet Panel features 2-stage filtration and is able to deliver regulated breathable compressed air to all 3M Supplied Air systems.

Features

- Compact dimensions allows wall mounting in tight spaces
- Standard wall mount bracket allows easy installation near location of use
- Wide application
- Breathable air filters and filter elements are suitable for use with mineral and synthetic oils plus oil free compressed air applications

Caution: These filter panels will not remove certain types of gases including Carbon Monoxide (CO) and Carbon Dioxide (CO₂)

Specifications

- Maximum Air supply 990L/min (35SCFM)
- Maximum working pressure 145 psig (10Barg)
- Maximum Inlet pressure 145 psig (10Barg)
- Threaded connection ½ inch NPT
- Outlet supplied with double action CEJN fittings compatible with 3M Airline breathing hoses
- Recommended filter replacement schedule; Particulate element 1 year, Carbon element 6 months

Where required by supply air quality, and to extend filter life, 3M recommend a water separator and 1 micron particulate filter are installed prior to the filter panel

Warning: Breathing air systems are designed to offer the user protection in potentially harmful environments, as such it is imperative that these products are correctly installed, used and maintained by a competent person in accordance with the manufacturer's instructions and AS/NZS 1715.
