

Hex Anchor Bolt (Hilti Plug and Small Washer)

Product Images

1

Description

Fix our range of speed humps and bollards with this revolutionary anchor bolt and Hilti plug.

Product Notes:

- Bites into the substrate to provide industry best stability for your humps and bollards etc.
- Features a unique anchor design.
- Made of Zinc plated steel so it will never rust.
- Can be used on all products to secure into **both concrete and asphalt applications**.
- Can not be secured on loose gravel.
- NOTE: Suits all Bollards and Speed Humps.

Fixing Instructions:

- 1. Drill bit diameter: 14mm.
- 2. Drilling depth: 110mm.
- 3. Standard embedment depth: 85mm.
- 4. Drill holes in required locations and clean.
- 5. Hammer the plastic casing into the hole.
- 6. Fasten the bolt (with washer) into the casing.
- 7. As you drill the bolt into the casing, the casing will twist & expand in the hole, holding the bolt in with a firm grip.

Note: Some asphalt applications where the asphalt has not been properly compacted or aggregate is loose may cause fixing not to secure properly.
